Bammidi Pragati Rao

626-126-7978 | bammidipragatirao.252cd005@nitk.edu.in | linkedin.com/in/pragati-rao-bammidi | github.com/bpragatirao

Education

National Institute of Technology — Surathkal, Karnataka
Masters in Computational and Data Sciences — *Aug 2025 – Present*

Sri Sairam College of Engineering — Bangalore, Karnataka
Bachelors in Computer Science and Engineering — *Aug. 2019 – June 2023*

D.A.V. Public School — Bilaspur, Chhattisgarh
Higher Secondary Education — *Apr 2016 – May 2018*

Experience

Software Engineer — Aug 2023 – Sept 2025
Tata consultancy Services — *Bangalore, Karnataka*

- Architected and maintained Pega BPM workflows alongside UiPath RPA solutions to automate complex financial operations, significantly reducing manual intervention and increasing operational efficiency.
- Queried DB2 for data extraction, validation, and reporting
- Explored Generative AI platforms/tools like Kore.ai and Search.ai

React Front-End Web Development Intern — Dec. 2021 – Apr 2022
SuperBolter — *Bangalore, Karnataka*

- Modern Frontend Development: Engineered responsive, user-centric interfaces by leveraging React.js hooks and functional components to build modular, scalable UI systems within fast-paced Agile environments

Projects

National New Account | *UiPath RPA, PEGA BPM, OCR, PostgreSQL*

- Designed end-to-end automated verification processes by integrating Pega BPM with UiPath, leveraging robotic automation to streamline identity validation and optimize account management lifecycle efficiency.

Deep-Trace BPM | *Python, Pytorch, Machine Learning*

- An advanced predictive process mining framework using Attention-based LSTM networks to predict next activities and cycle times in business processes using XES event logs.

Eco Retail Platform | *Python, Flask, Machine Learning*

- Leveraged predictive modeling to transform retail transaction data into actionable insights, streamlining supply chain efficiency and aligning business operations with sustainability goals.

Semantic Information Retrieval System | *Generative AI, Search.ai, NLP, LLM*

- Engineered a high-performance semantic search engine utilizing deep learning embeddings, moving beyond keyword matching to deliver contextually relevant search results within massive document repositories.

AI Virtual Assistant | *Responsive AI, Kore.ai, NLP, LLM*

- Streamlined customer interaction workflows by developing a scalable Kore.ai chatbot, integrating real-time API response handling and intent-based routing to provide high-fidelity, context-aware user support.

Technical Skills

Languages: Python, SQL (Postgres), JavaScript, HTML/CSS
Core: DSA, ML, Generative AI (Search.ai), Kore.ai, PEGA, UiPath
Frameworks: React, Node.js, Flask, Pytorch
Developer Tools: Git, Jupyter, VS Code, Visual Studio, Postman
Libraries: pandas, NumPy, Matplotlib, Scikit-learn

Certifications

Computing in Python: Control Structures by EDX
Introduction to Web Development: Programming using HTML and CSS by Microsoft Technology Associate
Pega BPM Certified: System and Senior System Architect
Generative AI Certifications: in Kore.ai and Search.ai tools/platforms
UiPath Robotics Process Automation: Certified in RPA and Development in UiPath
